FIRST ANNOUNCEMENT

The International World Wide Web Conferences Steering Committee (IW3C2) and Universidad Politécnica de Madrid (UPM) cordially invite you to participate in the 18th International World Wide Web Conference (WWW2009) to be held in Madrid, Spain's capital.

The World Wide Web Conference is the global event that brings together key researchers, innovators, decision-makers, technologists, businesses, and standards bodies working to shape the Web.

Organized by IW3C2 since 1994, the WWW conference is the annual opportunity for the International community to discuss and debate the evolution of the Web.

The conference will feature a range of presentations on world-class research, as well as stimulating talks, workshops, tutorials, panels, and late-breaking posters. A separate track will be devoted to current W3C activities of interest to the WWW community.

WWW2009 seeks original papers describing research in all areas of the Web covering the implications of ubiquitous access to the Web through the "three screens" - computer, phone, and TV - and how such Web access will change the way we live, work, and interact in the future. Accepted refereed papers will appear in the conference proceedings published by the Association for Computing Machinery (ACM).

Topics of discussion will include Browsers and User Interfaces, Data Mining, Industrial Practice and Experience, Internet Monetization, Mobility, Performance and Scalability, Rich Media, Search, Security and Privacy, Semantic / Data Web, Social Networks and Web 2.0, Web Engineering, XML and Web Data.

PRELIMINARY DATES

Submissions: 31st October 2008
Early Registration: February 2009
Hotel Reservation: March 2009
Conference: 20-24 April 2009
